This game is super janky which really isn't what you want in a puzzle game like this. Some of the difficulty just comes from not being confident about the english translation or things clipping through each other, etc. I'm also pretty sure it doesn't actually accept all correct solutions on floor 1. Cool concept to make the puzzles into a race and release them over time, but the execution just isn't there to make it worthwhile.. as always very cool game we have played a bunch of there escape room games and all have been challenging and fun would recomed for both VR and pc users. thanks for another grate game hope there will be DLC. Whatis this

I'm not kidding, it's a bad game. Nice and short game.. A blast from the past! Decent control, If you have a coupon for this game then buy it but I would not recommend paying full price for it. 6/10. I like this demo the game has a lot of potential and could be one of the first RPG on the Vive, Horse riding is cool and the environments along with the characters all have a cartoonish look to them, The combat is basic but has promise with a telekinetic ability you can fire rocks or anything else you can pic up, It has full voice acting and I felt immersed in the little story enfolding, No lip sync but I felt the characters gave a good presence when acting, Also you can have full locomotion or teleportation which is great for all players. All in all an exciting title for the Vive looking at the promised content for the game, just hope they deliver, thumbs up.. Heyyo, this game fails to be anywhere as entertaining as Carmageddon which it seems to aim to be like... the campaign mode is not interesting, the driving mechanics are generic so not bad but not great.. the only thing I say it has is nice graphics.
