pdf ebook, all the theories associated with sexual intercourse are described in a most lucid way. Koka Shastra is the finest tome in the instance of Koka Shastra. This book is a guide to Koka Shastra and contains practical ideas and procedures for people of all types and lifestyles. The system of intercourse will be useful for all who aspire to a better sex and to gratify their partner. 1. Field of the Invention The present invention relates to a vehicular brake operation assisting apparatus, and more specifically to a vehicular brake operation assisting apparatus, which is provided with a power storing unit for storing electric power, a power supplying unit for supplying electric power to the power storing unit from an external power source, and a power transferring unit for transferring electric power stored in the power storing unit to the power supplying unit. 2. Description of the Related Art A vehicular brake operation assisting apparatus has been proposed, which is provided with a power storing unit for storing electric power, a power supplying unit for supplying electric power from an external power source, and a power transferring unit for transferring electric power stored in the power storing unit to the power supplying unit. For example, in a conventional vehicular brake operation assisting apparatus, electric power stored in the power storing unit is transferred to the power supplying unit through the power transferring unit, so that electric power, which is supplied from the external power source, to a brake operation system including an electric motor for generating a brake assisting force, a microcomputer and so on, is supplied to the brake operation system. In the conventional vehicular brake operation assisting apparatus, electric power, which is stored in the power storing unit, is transferred from the power supplying unit to the power transferring unit, so that heat is generated at the power transferring unit. Accordingly, it is necessary to dissipate the heat generated at the power transferring unit, thereby requiring a cooling apparatus. Thus, in the conventional vehicular brake operation assisting apparatus, when electric power is transferred from the power storing unit to the power supplying unit through the power transferring unit, the heat generated at the power transferring unit may result in reduction of the service life of a circuit connected to the power transferring unit. * * For the full copyright and license information, please view the LICENSE * file that was 82157476af
